# Md. Parves Ahmed Shuvo

MERN stack Developer

Email: parves.dev@gmail.com

Phone: +8801620409573
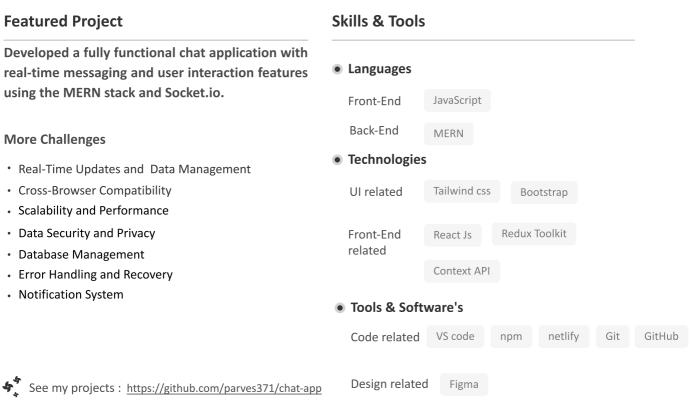

[GitHub]

## Summary

A dedicated and passionate MERN stack developer with a focus on building dynamic real-time applications. Familiar with JavaScript frameworks and libraries including Redux and Styled Components. Strong knowledge Build and deploy RESTful APIs, securing them with JWT, OAuth, and other security protocols. experienced in NoSQL databases, especially MongoDB, and has experience in optimizing application performance Through data modelling and caching techniques like Radis. Expert in planning and execution of firm RESTful APIs, and applications secured by industry-standard practices. They are eager to contribute to innovation The projects expanded my skills in a professional setting

## Featured Project

**Developed a fully functional chat application with real-time messaging and user interaction features using the MERN stack and Socket.io.**

### More Challenges

- Real-Time Updates and  Data Management
- Cross-Browser Compatibility
- Scalability and Performance
- Data Security and Privacy
- Database Management
- Error Handling and Recovery
- Notification System

See my projects : https://github.com/parves371/chat-app

## Skills & Tools

- **Languages**

  Front-End    JavaScript

  Back-End    MERN

- **Technologies**

  UI related    Tailwind css    Bootstrap

  Front-End related    React Js    Redux Toolkit    Context API

- **Tools & Software's**

  Code related    VS code    npm    netlify    Git    GitHub

  Design related    Figma

## Hobby

Watching Movies    Cricket    Football

Anime    Manga

## Currently Preparing

Embarking on learning Next.js, Prisma, and DSA to advance my web development skills. Next.js for efficient web app development, Prisma for modern database management, and DSA for optimized code. Excited to apply this knowledge to real-world projects and stay at the forefront of web development trends.
